

Solar energy, design and innovation: Zeliatech announces the distribution of DYNAMO[®] products

Vimercate (Monza Brianza), March 02, 2026 – Zeliatech S.r.l., European distributor of sustainable technologies and part of the Esprinet Group, announces that it has signed an agreement with **DYNAMO[®]**, a brand of **Verde21 S.p.A. Società Benefit**, part of the GEWISS group, which designs and manufactures photovoltaic sculptures capable of converting solar energy into services for residential, business and urban environments.

DYNAMO's mission is to design advanced energy systems capable of producing energy efficiently, without compromising the environment or landscape architecture, accompanying a definitive transition toward clean, free energy in harmony with Nature.

Zeliatech will present the solutions through its distribution partners with whom it collaborates on the European markets for the distribution of photovoltaic and storage products and solutions. In addition to pure product distribution, Zeliatech will provide design, delivery and technical support. Design-oriented photovoltaics are a particularly interesting solution for certain applications that do not allow for rooftop solutions, or for those who value a solution that is both visually appealing and effective in terms of performance.

This collaboration will enable **Zeliatech** to go beyond the boundaries of traditional photovoltaics by distributing the entire **DYNAMO[®]** range in the world of plant engineering and energy efficiency in Europe, with a particular focus on the Italian, Benelux, Irish, Spanish and Portuguese markets.

Thanks to this distribution agreement between **Zeliatech** and **Verde21**, customers committed to ecological transition will have the opportunity to take advantage of solutions that meet the needs of contexts subject to landscape constraints, offering energy systems that are harmoniously integrated into the environment. An offer aimed at the residential, business and public administration sectors, capable of enhancing every space with a sustainable approach and high design value.

*"With the addition of DYNAMO[®] photovoltaic sculptures to our range, we are not only introducing a new technological solution, but also a different way of experiencing energy: more integrated, more harmonious and immediately usable in everyday spaces". Declared **Andrea Rocchi, Head of Marketing at Zeliatech.** "For us, the collaboration with GEWISS and Verde21 represents the meeting of an advanced design idea and the ability to transform it into a product that is truly accessible to the market. Thanks to the technical expertise of our Service Center and the distribution capabilities of Zeliatech, we are bringing this vision to life in a concrete way: solar energy becomes an elegant, widespread element that is in perfect harmony in the environment.*

“With the presentation of our new photovoltaic sculptures at Key Energy, we are not only unveiling a product, but a vision where clean energy becomes art and architectural integration”, explains Luca Fornasari, Chief Product Officer GEWISS – CEO Verde21. “The partnership with Zeliatech represents the natural union between DYNAMO’s technological innovation and the distribution strength of a European leader: together, we are turning sustainability into an accessible design choice, accelerating a future in which solar-generated energy is everywhere, elegant and in perfect harmony with the environment around us.”

About Zeliatech

Zeliatech is a European green tech distributor committed to actively promoting sustainability by offering innovative products and solutions that inspire and enable the global ecological transition.

The company’s mission is to support its partners throughout the Green Transition, leveraging a team of specialized professionals and a portfolio of cutting-edge solutions designed to facilitate renewable energy generation (photovoltaics), sustainable mobility (e-mobility charging solutions), energy efficiency in buildings (Smart Building), and Data Center optimization (Data Center Facility).

Zeliatech, the green side of Esprinet, represents the sustainable soul of the Group — a leading distributor in Southern Europe and among the top ten worldwide. Zeliatech shares the Group’s key assets: strong logistical and financial capabilities, deep marketing expertise to support sales and demand generation, and a well-established presence across its core markets, ensuring close proximity to partners engaged daily in the green economy challenge.

The Esprinet Group is listed on the Italian Stock Exchange and reported revenues of €4.1 billion in 2024, serving 30,000 active clients, with a portfolio of 800 brands and over 1,800 employees.

About DYNAMO[®]

DYNAMO[®] is a brand of Verde21 S.p.A. Società Benefit, born from values of innovation, respect for the environment and energy efficiency. In just a few years, Verde21 S.p.A. Società Benefit has achieved significant growth, evolving from a startup in the photovoltaic sector to an Italian industrial company active in energy innovation, consolidating its role within the GEWISS ecosystem. DYNAMO’s mission is to bring aesthetics, beauty and design vision to the world of plant engineering and energy efficiency, going beyond the boundaries of traditional photovoltaic.
